

KITCHEN & BEDROOM LIGHTING RANGE 2017

AT THE FOREFRONT OF LIGHTING INNOVATION

We pride ourselves on being different.

Our unique LED lighting collection is tailored specifically for the kitchen, bedroom and bathroom market. We place our focus on designing and developing our product range year-on-year to bring unique, design led products to market featuring the very latest in lighting innovation.

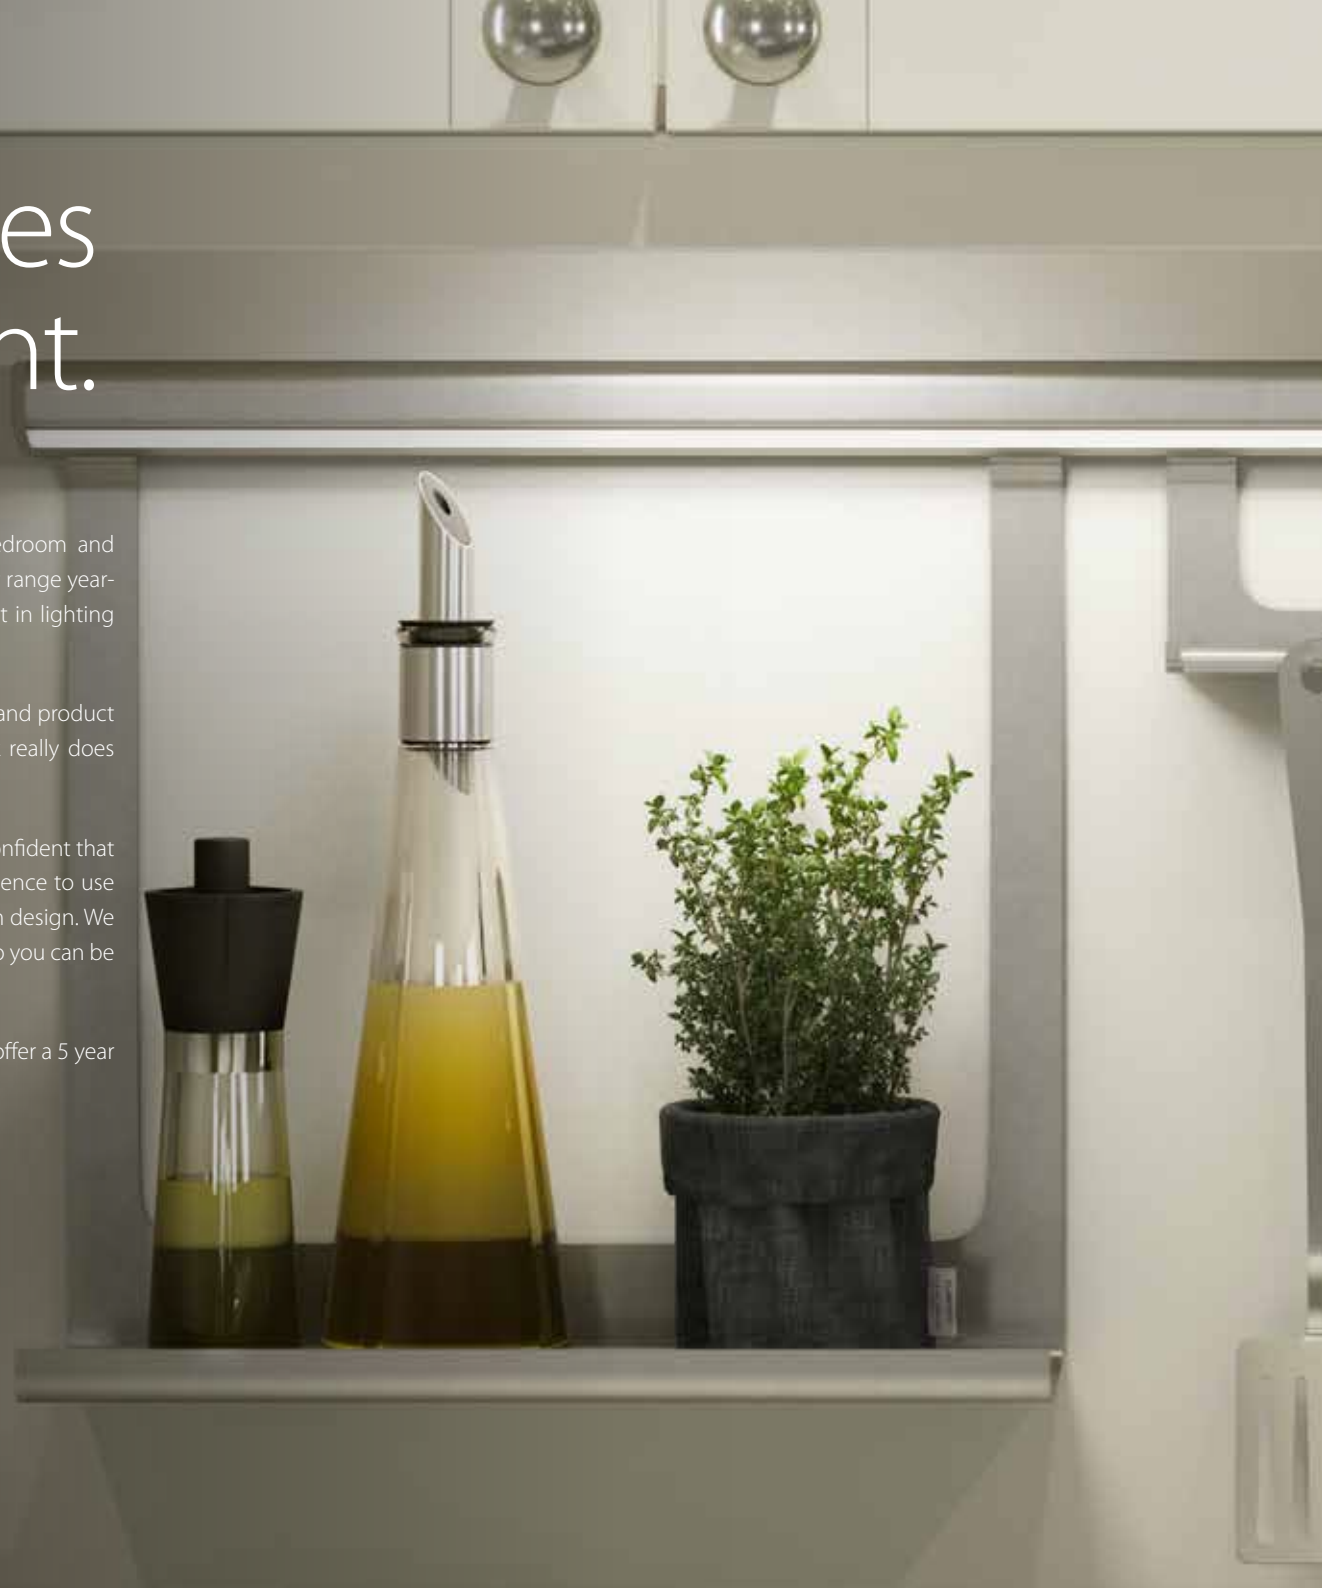

We continually aim to improve our product portfolio with new product designs and product upgrades. Our customer orientated focus is what sets us apart, your feedback really does guide the way we develop our product range.

Proud to be specialists in our field, our knowledge spans over 16 years so we're confident that we have the skills and understanding to provide our customers with the confidence to use our products to create the perfect finishing touch to every kitchen and bedroom design. We continually review our support structure and make any required improvements so you can be assured you are receiving the guidance you need.

To further emphasise the value we place on the high quality of our products we offer a 5 year guarantee on all kitchen and bedroom fittings in this brochure.

The importance of kitchen lighting...

Lighting is no longer just a kitchen accessory, it's a necessity. Transform your kitchen designs by incorporating a lighting scheme in the initial design stages. Just look at how a lighting scheme transforms this kitchen which only has ceiling spot lights.

Our values...

QUALITY IS PRIORITY

We pride ourselves on offering nothing other than products of the highest quality. We will only use the best components and materials to guarantee long-life performance, high light output and enhanced durability. To reflect the high quality of our product portfolio the products in this catalogue come complete with a 5 year guarantee for the peace of mind of both you and your customers. We are proud to have achieved ISO 9001: 2015 Quality Management Status, demonstrating our ability to meet both customer and applicable statutory and regulatory requirements.

DESIGN & INNOVATION

Design and development is at the heart of what we do. We take pride in the fact that we design and develop our innovative products in the UK, allowing us to put our expertise and industry knowledge to use, ensuring every detail is designed to meet the requirements of our customers. Our product portfolio is updated as frequently as is required to ensure we are always offering the latest in lighting innovation for our sector. We take into account the latest trends, latest LED technology and most importantly the feedback of our valued customers. We don't just introduce new products; we take popular existing designs and improve them to ensure we are always at the forefront of our industry.

DEDICATED SUPPORT

We offer comprehensive training and lighting advice so that you can get the most from your kitchen or bedroom lighting design. Our dedicated customer service team are here to help you with any needs or technical support you may have. Our comprehensive website and brochures are designed to help you with all your lighting requirements and make it easy to choose the right products for your customers. We take into account the questions we are asked and incorporate the answers into our marketing material. With over 16 years industry experience let us show you the Sensio way.

LED. THE SMART CHOICE

LED is fast becoming the only light to live by in the home. With other light sources becoming quickly obsolete, soon LED will be the only option. Although the initial cost of LED's are higher than less efficient light sources such as halogen and fluorescent, the cost of running them in the long term is significantly less. When comparing LED to halogen lamps you could save around £131 per year on energy bills. They also have a much longer lifespan, lasting up to 12 times longer than halogen fittings. An LED fitting will often outlive the kitchen it has been installed in. For more information on the benefits of investing in LED's visit www.sensio.co.uk

DISCOVER SENSIO ONLINE

The Sensio website has been designed to aid anyone who aspires to introduce a lighting scheme into their kitchen, bedroom or bathroom. On our website you can find information on all of our products including installation guides, technical information and frequently asked questions. Our customers can place orders online quickly and easily, check product availability, progress orders and manage their account. We are available on desktop, tablet and mobile to make it as convenient as possible. See for yourself by visiting www.sensio.co.uk

WE MAKE IT EASY TO SPEC OUR LIGHTING

We know exactly how important it is for you to show your customers how their kitchen design will look in the initial stages. Adding a stunning lighting scheme to your plans may just give you the edge and provide the additional 'wow' factor your customer is looking for. That's why we have made it as easy as possible for you by ensuring the entire Sensio portfolio is available on the leading kitchen design software; 2020, KBB Connect, KBB Smart and Compusoft.

Colour Temperatures

The LED colour that you choose for your kitchen can make a huge impact! Use these pages as a guide to help you choose the best LED colour for your kitchen design.

Warm White

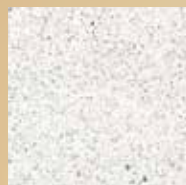

Cool White

Beige Granite

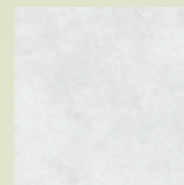

Beige Matt

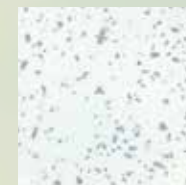

Sandstone

Marble

Grey Granite

White Granite, Silver Fleck

White

Grey Matt

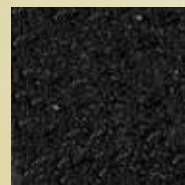

Oak Timbers

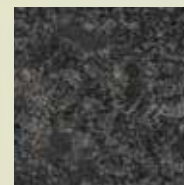

Oak Timbers

Walnut Timber

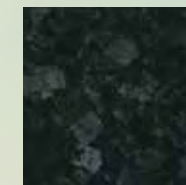

Black Granite, Gold Fleck

Dark Grey Granite

Slate

Gloss Slate

Black Granite, Silver Fleck

Warm white LED's emit a yellow glow (similar to that of halogen) and complement a traditional kitchen style featuring wood surfaces and muted worktops perfectly.

Cool white LED's are more suited to contemporary/modern kitchen styles. Gives a more modern effect, bouncing off gloss or contemporary surfaces to create a stunning effect.

The general rule of thumb is; for contemporary kitchen designs, opt for cool white LED and for traditional kitchen designs opt for warm white LED. However, it is important that you consider the worktop when selecting your under cabinet lighting. Use the guide above to ensure you choose the best LED colour for your designs every time.

What to consider when designing a lighting scheme...

1. Task Lighting

Understanding the lighting needs of a kitchen as a working space is crucial when planning a lighting scheme. Ask your customers how they envisage using the space and where they will need specific light sources. Task lighting does exactly what the name suggests, it is perfectly positioned to ensure the kitchen is an efficient working space for everyday tasks like food preparation. Typically, kitchen task lighting is positioned under wall units to illuminate the worktop, giving light exactly where it is needed. Reading lighting in the bedroom allows you to read your favourite book in bed without bright overhead lighting.

2. Mood Lighting

The key to achieving a lighting scheme that meets your customer's aesthetic aims as well as their practical needs is in understanding how they will use the space. Often the kitchen is used as a social space as well as a practical one, so the integration of mood lighting provides an additional depth to the room and a change in atmosphere when required. Consider lighting along the plinth, uplighting above wall units, lighting beneath breakfast bars or on the underside of a worktop and lighting the internal of glass fronted cabinets. Often the most overlooked aspect of a lighting scheme, mood lighting really does have the biggest impact.

3. Convenience Lighting

Convenience lighting illuminates cupboards, wardrobes and drawers when opened for ultimate ease of use. A beautiful extra which adds the ultimate finishing touch and brings a level of luxury to any kitchen or bedroom design.

PAD2

Prismatic LED Light

'improved, enhanced, upgraded'

- > An upgrade to the original LED PAD. This fitting features prismatic LED technology, one of the latest developments in LED technology for kitchen lighting. The fitting has an innovative diffuser with an etched design to completely diffuse the LED's.
- > This fitting has been redesigned with a depth of only 7mm. A discreet solution, great for kitchens without a pelmet.
- > The light panel has been significantly elongated to almost the full length of the fitting, allowing for an increased spread of light across the worktop. This fitting truly casts useable light exactly where you need it.
- > Absolutely no visible diodes reflect on the worktop to give the appearance of a sheet of pure light for a superior finish to your kitchen design.
- > PAD2 offers a superbly bright light output.
- > Available in both cool white and warm white LED, choose the option which will work best with the work surface and kitchen style.
- > This fitting has a maximum luminous efficacy of 88 lm/W.
- > Switch/dim using Sensio sensors and controllers.

COB LED Recess/Surface Light

'COB LED - the latest LED technology'

- > Guaranteed to provide the highest luminous efficacy when compared to other like-for-like products currently on the market*
- > COB LED is a unique configuration of closely compacted LED's. It provides enhanced efficiency, a higher light output and a more uniform appearance.
- > The fitting is supplied with the collar. Can be either surface or recess mounted.
- > This fitting has a maximum luminous efficacy of 95 lm/W.
- > Stainless Steel fitting available with either cool white or warm white LED, great for both contemporary and traditional kitchens.
- > Despite the high output of this fitting, a low wattage of 3W is maintained.
- > IP43 rated - suitable for use close to a sink (protected against direct sprays or splashes of water).
- > Switch/dim using Sensio sensors and controllers.

'kitchen lighting you can play your music through'

- > High output LED light with built-in Bluetooth RF audio speaker. Wirelessly connect your mobile device with the SensioSound to play your music through the product.
- > One device provides task lighting and allows you to play your music, perfect for when you're cooking or entertaining. Keep your kitchen surfaces tidy from external devices used to play music through.
- > Has the highest light output of any current Sensio under cabinet spot light.
- > Diffused LED points for a streamlined and aesthetically pleasing appearance.
- > Two of these fittings can be used in sync with one another to fill the room with music.
- > Quick and extremely simple to use, all you need is a SensioSound fitting, 12V driver and a mobile device with Bluetooth. No receivers, wireless boxes or additional wiring required.
- > Operational range of up to 10m.
- > Simple to install via surface mounted fixing with a steel effect finish.

'multi-functional UK product design'

- > An upgrade from the original Quadra under and over cabinet lights. Designed by Sensio in the UK this is a unique product design.
- > Transform this product into an over cabinet light by purchasing the bracket.
- > The specialised lens on this product diffuses the LED's to create the appearance of invisible diodes.
- > Featuring a higher number of LED's than the original Quadra range for an improved light output.
- > The sensor has been upgraded to IR to maintain hygiene levels in the kitchen.
- > The fittings daisy chain together (run 6 from a 15W driver). Daisy chain non-sensor fittings into one sensor fitting for synchronised switching of all lighting in the run via the integrated IR sensor switch.
- > Specially designed mounting brackets for simple installation. The over cabinet bracket slides along the fitting for desired positioning of the light.
- > The new elongated design allows for an increased spread of light across the worktop.

Designed in the UK

'high quality, high output'

- > Surface Light Source (SLS) products are LED fittings with no visible LED points.
- > This fitting has a luminous efficacy of 72 lm/W, making it over 35% brighter than others on the market*.
- > The sleekest and brightest of all of the current Sensio SLS LED under cabinet spot lights.
- > Available in both cool white and warm white LED, choose the option which will work best with the work surface and kitchen style.
- > Use as task lighting under cabinets or to illuminate cabinet interiors in glass fronted wall units.
- > Spacer included, fitting can be surface mounted or recessed.
- > Long lamp life - lasts up to 32,500 hours more than halogen.
- > Switch from halogen and see significant savings on your energy bills.
- > Why this SLS spot light? The aluminium of this fitting has good thermal conduction, which in turn creates over double the light output than a steel SLS fitting.

'frosted cover for diffused LED's'

- > The fitting is supplied with the collar, can be either surface or recess mounted.
- > Sleek appearance. The LED's are diffused by a frosted cover making for a more aesthetically pleasing fitting, whilst retaining a high light output.
- > This fitting has a luminous efficacy of 61 lm/W, making it almost 10% brighter than others on the market*.
- > Stainless Steel fitting available with either cool white or warm white LED, great for both contemporary and traditional kitchens.
- > The style of the fitting makes it a direct replacement for a halogen under cabinet recess/surface light. Purchase in warm white LED for a very similar colour representation also.
- > Long lamp life - lasts up to 47,500 hours more than halogen.
- > Over 90% less energy used when comparing to halogen. Save money on electricity bills when switching from halogen.

Nico

240V LED Surface/Recessed Light

'anyone can install - our first 240V SLS fitting'

- > Surface Light Source (SLS) products are LED fittings with no visible LED points.
- > This fitting runs at 240V so no driver is required.
- > Extremely simple to install if you use the 6 way distribution block. Simply connect up to 6 of the Nico fittings into the ports on the distributor block and connect this directly to the mains supply (13A plug pre-wired to the SE211570).
- > The 2 and 3 light packs include the 6 way distribution block (SE211570).
- > When using the distribution block anyone can install these fittings - no need for Part P as it is all plug and play.
- > Use as task lighting under cabinets or to illuminate cabinet interiors in glass fronted wall units.
- > Spacer included, fitting can be surface mounted or recessed.
- > Extremely long lamp life. This fitting will more than likely outlive your kitchen.
- > A much smaller and neater fitting than GX53 with a connector small enough to fit through an 8mm hole.

Orbit Tiltable LED Light

'tiltable, super bright LED spot light'

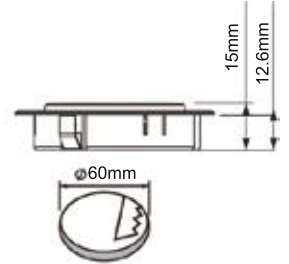

- > The tiltable centre section of this fitting allows you to direct the light to the position on the worktop or in a cabinet as you require.
- > The fitting is supplied with the collar, can be either surface or recess mounted.
- > 35% - 59% brighter than the SE9005HDWW/CW.
- > This fitting has a luminous efficacy of 59/81 lm/W.
- > High performance LED chips for optimum light output.
- > Available in both cool white and warm white LED to suit a variety of kitchen designs.
- > Use as task lighting under cabinets or to illuminate cabinet interiors.
- > Long lamp life - lasts up to 47,500 hours more than halogen.
- > Can be used with the range of Sensio switches and dimmers.
- > Die cast metal exterior with an aluminium effect finish.

Arrow

Slim Profile SLS LED Strip Light

'continuous, diffused LED under cabinet lighting'

- > The Arrow contains a unique configuration of diffusers that evenly distribute the light, meaning there are absolutely no visible LED points.
- > This slimline fitting is extremely adaptable. We offer 4 lengths, however the strips can be seamlessly interlinked with no visible joins for a superior streamline appearance.
- > With a slim profile of only 13mm this fitting is extremely discreet.
- > Available in both cool and warm white LED, the Arrow is suitable for both contemporary and more traditional kitchen designs also.
- > A high lumen output and wide beam angle for an optimum light cast.
- > When interlinking the Arrow a maximum length of 3600mm can be achieved.
- > Each end cap measures 20mm - ensure you account for this when specifying.
- > The starter cable is to be purchased separately. One starter cable is required for each run of strips to be connected back to the driver.

SLS Quadra LED In Cabinet Light

'improved design, unique to Sensio in the UK'

- > An upgrade from the original Quadra PLUS-I. Designed by Sensio in the UK this is a unique product design.
- > The specialised lens on this product diffuses the LED's to create the appearance of invisible diodes.
- > The integrated IR sensor operates the light as the cabinet door is opened/ closed. With light coloured doors the fitting can be placed 50mm from the door. With dark coloured doors the distance is 25mm.
- > Featuring a higher number of LED's than the original Quadra range for an improved light output.
- > Specially designed mounting bracket for simple installation.
- > The new elongated design allows for an increased spread of light throughout the cabinet.

Edge SLS LED Glass Clip Light

'glass shelves are a feature. Light them'

- > Fits a 6-8mm pane of glass.
- > Use on glass shelves inside glass fronted cabinets to introduce soft, ambient mood lighting.
- > The white diffused finish of the profile means the lights shines out towards the front edge of the glass and illuminates the inside of the cabinet itself also.
- > We listened to your customer feedback and have now introduced a warm white LED option for traditional style kitchens.
- > Can be cut to length if required (every 90mm or 7 LED's along the PCB).
- > The integrated diffuser creates the 'no dot' look on the front edge of the glass.
- > Extremely low wattage, meaning minimal energy consumption.
- > Use two lengths side by side for longer units.
- > Simple to install, clips onto the back of a glass pane and connects up to the suitable driver.
- > A relatively low cost item which creates a stunning effect.

SLS Quadra

LED Under/Over Cabinet Light

'multi-functional UK product design'

- > An upgrade from the original Quadra PLUS -O. Designed by Sensio in the UK this is a unique product design.
- > Use this product as an over cabinet light by purchasing the mounting bracket (SE240920).
- > The mounting brackets are specially designed for simple installation. The over cabinet bracket slides along the fitting for desired positioning of the light.
- > The specialised lens on this product diffuses the LED's to create the appearance of invisible diodes.
- > Featuring a higher number of LED's than the original Quadra range for an improved light output.
- > The fittings daisy chain together (run 6 from a 15W driver).
- > The new elongated design allows for an increased spread of light across the cabinet front.
- > This fitting is a great option for creating mood lighting by illuminating your kitchen cabinets or use above wardrobes for a simple way to introduce mood lighting in the bedroom.

Flexible Strip Lighting >

An introduction to flexible strip lighting...

Flexible strip quick selection guide

There are a few things you need to know before selecting the best flexible strip for your design. Our quick selection guide below will help you make a quick and informed decision.

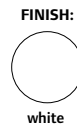

Design idea
Add depth to your kitchen by adding flexible strip lighting above wall units, along the plinth or under the work-top.

	Compact	Viva	Primo	DuoFlex	RGB
Maximum length of strip you can run from a single driver	8m	12m	13.75m	6m	10m
Available lengths	1m & 2m	333mm, 1m & 2m	5m	1m & 2m	330mm & 2m
LED colour	CW & WW	CW & WW	CW & WW	Mix CW & WW	RGB
Number of LED's	90	36	72	36/72	36
Brightness	540 lm	210 lm	342 lm	300 lm	180 lm
How many times the strip can be cut and re-used	Once	Once	Up to 50	None	None
Product section visual					

Figures are based on a 1m length, Cool White LED & using the largest driver available (or the maximum allowance). The RGB & DuoFlex can be cut however the cut section cannot be re-used.

Compact Multi-point LED Flexible Strip

'more diodes, closer together - no dark spots'

- > A higher number of diodes per flexible strip means there are minimal dark spots. This provides a sleeker finish when used on a plinth in a kitchen with a glossy tiled floor or in an aluminium profile.
- > Self-adhesive 3M tape backing allows for quick and simple installation.
- > Male and female ends on the strip allow you to create the length required.
- > The strip can be cut to length, scissor marks on the product mark where suitable to cut (every 65mm).
- > Cut the strip ONCE and re-use the cut off piece using the mini-cut connector (SE90317HD).
- > Use this product for a variety of applications (on the plinth, on the underside of the bed, above cabinets/wardrobes to up-light the ceiling to name a few).
- > All you need to install is an adequate amount of flexible strips, driver connection lead(s) – one per run of strips and a LED driver.
- > Run 10m from one 60W driver.

Code	Wattage	Length	LED's	LED Colour	Lumens	Driver	RRP

Flexible Strip Lighting >

DuoFlex Flexible Strip

'seamlessly mix colour to create the perfect mood'

- > The DuoFlex brings real flexibility to the flexible strip light range. With only one flexible strip the LED colour can be set from warm white through the full spectrum to cool white.
- > Self-adhesive 3M backing allows for quick and simple installation.
- > Male and female ends on the strip allow you to create the length required.
- > The strip can be cut to length, scissor marks on the product mark where it is suitable to cut (every 165mm). The strip can be cut once and once cut that is the end of the run. The cut piece with the female end cannot be reused.
- > Operate using a remote control or Sensio Multi-Light app. One remote will control all receivers within a 15m radius.
- > A maximum length of 6m of the DuoFlex can be run from each receiver.
- > Ten brightness levels of the LED, dim or brighten in 10% increments.
- > The wattage of the driver included in the packs is 30W.

Main image shows the DuoFlex set to cool white

Code	Wattage	Length	LED's	Colour Temp.	Lumens	Driver	RRP

SE1003000 - DuoFlex Remote Control (see page 60 for details)

SE1004100 - DuoFlex Receiver (see page 60 for details)

Cool white & warm white diodes side by side. The strip is marked at intervals where it can be cut.

From top to bottom: warm white LED, natural white LED and cool white LED.

Cables/accessories

Driver Connection Lead – 2500mm - (SE10325) - £3.96
One driver lead is required for each run of the DuoFlex.

DuoFlex Inter-Connecting Lead – 500mm (SE10328) - £2.88
 DuoFlex Corner Connection Lead – 50mm (SE10327) - £2.64

DuoFlex Remote Control

'control both LED colour and brightness'

- > The DuoFlex remote control allows you to choose from both cool white and warm white LED, or to create a natural white tone by mixing the two colours.
- > One remote can control multiple receivers (as many as you require, within a 15m radius), allowing you to control DuoFlex located in different areas of the kitchen.
- > Functions of the DuoFlex remote control:
 - Rotate the colour temperature wheel to select the desired colour temperature.
 - Decrease the brightness level of the DuoFlex strips (in 10% increments).
 - Increase the brightness level of the DuoFlex strips (in 10% increments).
 - On/off – switch the connected fittings on/off.
 - Memory function of the last setting before switched off.
 - Radio Signal - the maximum range of the remote control is 15m.

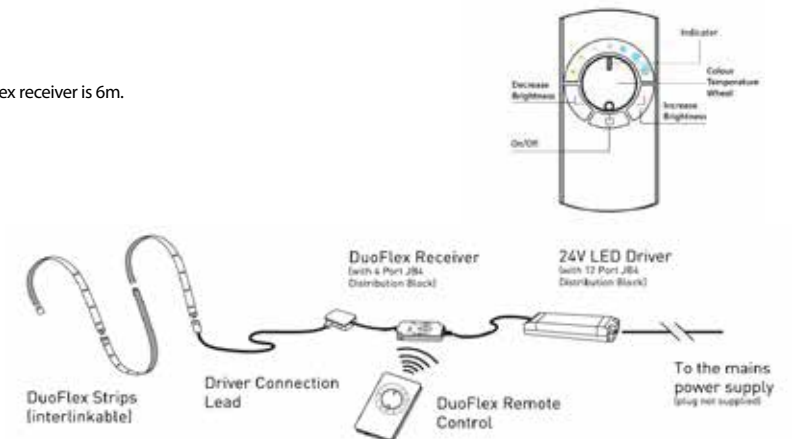

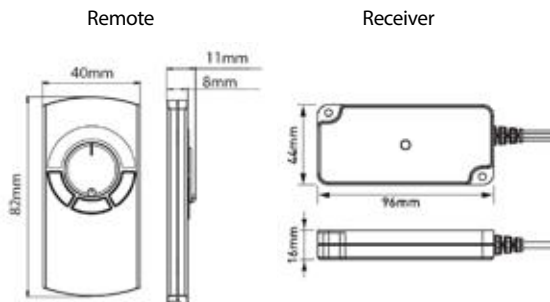

Code	Product Description	Max. Wattage	Driver	RRP
SE1003000	DuoFlex Remote Control	n/a	■	£24.70
SE1004100	DuoFlex Receiver	22.5W per receiver	■	£34.20

The SE40555 15W driver will run a maximum of 4m of the DuoFlex.
 The SE40556 30W driver will run a maximum of 6m of the DuoFlex.

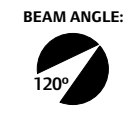

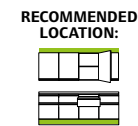

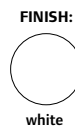

The maximum length of the DuoFlex which can be run from one DuoFlex receiver is 6m.

NB: When buying the DuoFlex flexible strip lighting, you require a driver, driver connection lead and remote control for each run of strips. These are purchased separately (unless buying in a pack). One receiver is required for each driver.

To control the DuoFlex Flexible Strip from your phone see page103.

RGB Colour Changing Flexible Strip

'7 colours, 3 effects'

- > Self-adhesive 3M tape backing allows for quick and simple installation.
- > 7 preset colours of the RGB (cool white, violet, yellow, cyan, green, red and blue).
- > The perfect product to create mood lighting, either set to one of the 7 colours, or select the slow or rapid colour change option.
- > Male and female ends on the strip allow you to create the length required.
- > The strip can be cut to length, scissor marks on the product mark where suitable to cut (every 162mm).
- > Use the RGB remote control or Sensio Multi-Light app to create the effect or choose the colour that is perfect for you at the touch of a dial.
- > All you need to install is an adequate amount of flexible strips, driver connection lead(s) – one per run of strips, driver and a RGB control.
- > Run a maximum length of 12m from a 60W driver.
- > When using the RGB remote control, each new run of RGB strip lighting requires a driver and a receiver, however multiple receivers can now be controlled via one remote control.

RGB Remote Control

'quickly and easily set the mood'

- > Create the effect or choose a single colour that is perfect for you.
- > Multiple receivers can be controlled from one remote control (all receivers within a 15m radius of the remote at any one time).
- > 24V system allows for 60W of RGB product to be run per receiver.
- > Functions of the RGB remote control:
 - Single colour mode – select one colour by rotating the wheel
 - Gradual colour change – light colour gradually changes
 - Flashing colour change mode – light colour rapidly changes
 - Colour change speed – change the speed at which the colours change
 - Brightness level – change through the 3 brightness levels of the RGB
 - On/off – switch the connected fittings on/off
- > Memory function of the performance before last switched off.
- > Radio Signal - Maximum range of controller is 15m.
- > The remote control is powered by a 3V button lithium battery (supplied).

Code	Product Description	Max. Wattage	Driver	RRP
SE791090	RGB Remote Control	n/a	■ ■	£39.00
SE791050	RGB Receiver	30W/60W per receiver	■ ■	£28.08

NB: reference the maximum wattages stated above, the lower value relates to 12V (orange) and the higher value, 24V (green).

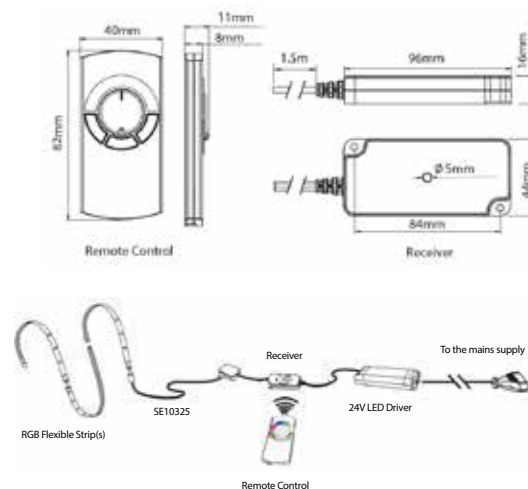

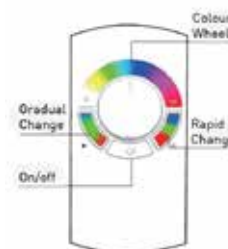

When buying Sensio RGB lighting, you require a driver, driver connection lead and controller (either Remote or Sensio Multi-Light app & Receivers) for each run of strips. These are purchased separately (unless buying in a pack). One receiver is required for each driver.

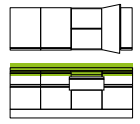

RGB Remote Control

Single colour; gradual colour change; rapid colour change; change colour change speed; dim; on/off

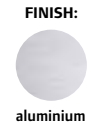

Aluminium Profiles >

Linia

Recessed Aluminium Profile

'flush fit for a minimalist look'

- > The Linia has been specially redesigned with an increased width and depth to house all of our single colour, RGB and Dual colour flexible strip lights from the Sensio range, allowing you to create your perfect lighting solution.
- > The diffuser has been manufactured from more flexible material so it is much easier to install.
- > We have redesigned the Linia end caps to be round that protrude from the fitting to fill the gap in the furniture when cut with a router for a much neater finish – end caps and mounting brackets supplied with each profile. The 1m profile has 2 mounting brackets and the 2.2m profile has 4.
- > Perfect for use under kitchen cabinets, inside larders or inside wardrobes.
- > Use with one of our in cabinet sensor switches (pages 108 & 109) when using inside a larder or cabinet so the light switches on/off as the door opens/closes
- > The aluminium lip either side of the fascia has been reduced for a more streamlined finish.
- > A versatile solution as both the profile and flexible strip can be cut to length.

Code	Length	LED Strip	Cable	Driver	RRP
SE980120	1000mm	Profile only	N/A	N/A	£11.76
SE980220	2200mm	Profile only	N/A	N/A	£23.76

Fino

Surface Mounted Profile

'customisable lighting'

- > The Fino has been specially redesigned with an increased width and depth to house all of our single colour, RGB and Dual colour flexible strip lights from the Sensio range, allowing you to create your perfect lighting solution.
- > Use the Compact or Primo flexible strip lights which have more diodes packed tightly together to create a more diffused lighting effect.
- > The diffuser has been manufactured from more flexible material so it is much easier to install.
- > End caps and mounting brackets supplied with each profile. The 1m profile has 2 mounting brackets and the 2m profile has 4.
- > The Fino and flexible strip range can be cut to length making this an extremely versatile solution – perfect when you have bespoke sizes to meet.
- > Whilst aluminium profiles are great for their aesthetic qualities, they are also very useful for extending the life of your LED strips.
- > Butt lengths of the profile together if a longer run is required.
- > Great for using under or inside kitchen cabinets and inside wardrobes.

Sensio Midway Hanging Rail

Award Winning
Our Midway Hanging Rail won a Silver Award for Best Lighting in the House Beautiful 2016 Awards and won in the 'Innovation in Functionality' category for the Designer Kitchen and Bathroom Awards 2016.

The ultimate solution for kitchen organisation and illumination

- Illuminated hanging rail system to be mounted midway between the wall units and the work surface.
- A unique Sensio product design.
- Build your own solution:
 - Four accessories available; large shelf, small shelf, utensil holder & kitchen roll holder.
 - Pick any single colour flexible strip from the range to include inside the profile.
- Keep worktops clear and necessities to hand.
- Designed, developed, perfected.

Midway will accommodate any single colour flexible LED strip from the Sensio range, simply choose your strip and insert in the profile channel (driver and cable also to be purchased separately).

Four accessories available: Large Shelf, Small Shelf, Utensil Hooks and Kitchen Roll Holder.

Branded end caps with cable channel for a high quality, neat finish and complete ease of installation.

Stackable accessories. The accessories have been developed so they can be sat against one another, allowing you more usable storage solutions in a compact space.

UK Product Design

Sensio Midway V1 Hanging Rail System

'kitchen organisation at its best'

- > Midway allows you to utilise the space between your wall units and worktop, providing task lighting and that essential additional storage space.
- > Build your perfect solution.
- > Designed by Sensio in the UK this is a completely unique product.
- > Two finishes of the Midway rail and accessories available; silver or black.
- > Four initial accessories available; kitchen roll holder, utensil holder, small shelf and large shelf.
- > The profile is available in a 1m* length, however if a longer length is required simply butt two profiles alongside one another.
- > Choose any single colour flexible strip from the Sensio range and simply slot into the profile channel.
- > The profile can be cut to length (ensure chosen accessories fit if you do cut).
- > The profile and accessories have an extremely high quality finish.
- > The cable can come through either the left or right side of the profile
- > Branded end caps included.

GU10 Dimmable COB LED Lamp

Zirconia Crystal Cone Pendant Light

'a drop of style'

- > Inject desirable mood lighting into your kitchen or bedroom with this exquisite droplet pendant finished in chrome and complete with a clear base laced with floating crystals.
- > The LED's bounce and reflect light from the crystals to provide a sparkling light that cascades down.
- > The 24 integrated LED's have a lifespan of 30,000 hours.
- > Combine the Zirconia pendant light with ceiling spotlights to provide both ambient and task lighting to your kitchen.
- > The pendant is suspended on a 920mm stainless steel cable which is adjustable so you can tailor the piece to fit according to your ceiling height.
- > This pendant looks stunning on its own or in a cluster with two or three fittings next to each other.
- > The Zirconia has been designed to be used above a kitchen island, dining table or in the bedroom. Use one either side of the bed above the bedside tables for the perfect finishing touch, this also works well if you have limited space for table lamps in that area of the room.
- > This pendant is IP44 rated so is suitable for use in the bathroom.

Bellatrix Crushed Crystal Pendant Light

'add glamour to your kitchen design'

- > This amazing pendant light features a polished chrome finish with a beautiful crushed crystal layer that sits on the bottom of the fitting.
- > The Bellatrix pendant has 972 integrated LED's that bounce light off of the crystals to create a stunning sparkling light effect whilst providing superbly bright illumination.
- > The pendant is dimmable so you can adjust the brightness as required.
- > The integrated LED's have a lifespan of 30,000 hours.
- > The pendant is suspended on 1.1m stainless steel cables which are adjustable so you can tailor the piece to fit according to your ceiling height.
- > The Bellatrix is guaranteed to be the centre of attention and looks stunning when suspended above a kitchen island or dining table.
- > This pendant is IP44 rated so is suitable for use in the bathroom.

Wireless Charging >

Qi Wireless Charger

'integrated wireless charging for the kitchen'

- > Integrate into the work surface for a flush fit, discreet and convenient wireless charging solution.
- > Simply sit any Qi enabled mobile device on top of the charger. If your device does not have Qi built-in an additional interface is required (see options below).
- > Removes the need for power cords. Simply place your phone on the charger for convenient charging whilst you're cooking or entertaining.
- > Charging distance 0-6mm.
- > Two finishes available; black and white. The white finish option has a silver finish around the edge of the fitting.
- > The charger must be fitted with a 25mm clearance from the edge of the work surface. The maximum worktop depth this item is suitable for is 60mm.
- > The lip is only 1mm deep for a completely flush fit.
- > Input: DC 5V - 1.5A. Output: DC 5V - 1A.

After **sensio**® lighting

Rechargeable Battery Wardrobe Lighting >

Innovative Lithium-ion Battery

Use our Rechargeable Lithium-ion battery solutions in wardrobes or kitchen cabinets. Simple, yet extremely effective.

Advantages of our rechargeable battery lighting range

- **No wiring.** No electrical installation required. Can be retrofitted by anyone.
- **Simple to maintain.** The battery within these fittings is to be recharged as required using a pluggable USB charger.
- **Low running cost.** The battery only needs to be recharged 2-3 times a year (based on an average usage figure).
- **Flexibility.** The fitting can be placed in any position in the cabinet without having to worry about visible cables or drilling holes for the cable.

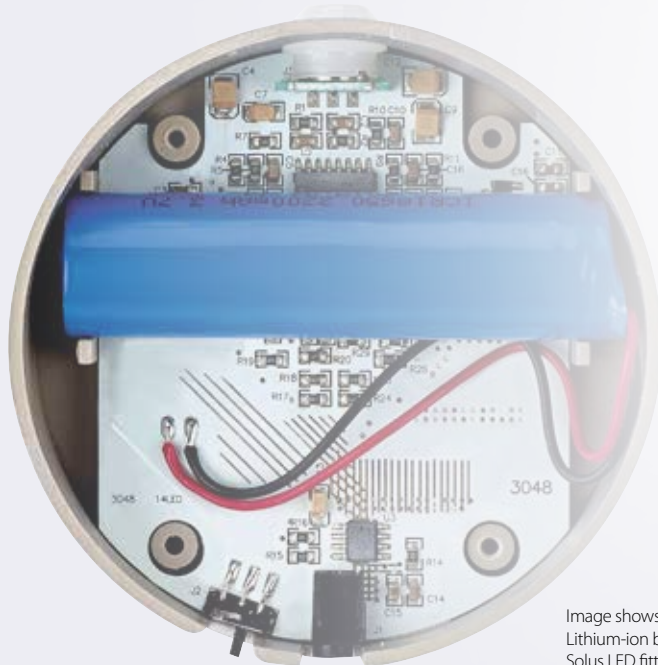

Image shows the rechargeable Lithium-ion battery inside the Solus LED fitting.

Image shows the Solus on charge using the USB outlet on the charger.

About the battery

- Lithium-ion battery
- Rechargeable
- High energy density
- Slow loss of charge when not in use
- Self-discharge rate of approximately 5-10% per month
- The lifespan of all products in this range is 30,000 hours
- Pluggable charger with 5m USB charging cable
- Charging time is 3-5.5 hours on average
- The running time of battery operated products between charging is 5-6.5 months on average (based on 2 minutes usage per day)

Alto LED Wardrobe Rail Light

'speed up your morning routine'

- > Aluminium wardrobe rail light with anti-slip design.
- > Features an integrated PIR sensor which automatically switches the light on when the wardrobe door is opened.
- > The PIR will remain on for 30 seconds and then automatically switch off if no movement is detected to ensure there is no power wastage.
- > The rail is available in 4 lengths, all of which can be cut down if required. (The cut lengths stated below are the maximum lengths which can be cut from the left side of the unit)
- > No electrical installation required. Contains a Lithium-ion rechargeable battery.
- > The run time of the product is 6.5 months based on 2.5 minutes of use per day. The charging time is 5.5 hours on average.
- > The LED's in this fitting have a lifespan of 30,000 hours.
- > Recharge the unit using the 03.2005.0800 pluggable USB charger.
- > The maximum weight load of the rail is 20kg.

Prisma Tiltable LED Wardrobe Light

'angle the light as you need it'

- > This discreet adjustable light is perfect for illuminating the interior of wardrobes and cabinets and is ideal for retrofitting.
- > The tiltable LED centre allows you to angle the light as required.
- > Contains a rechargeable Lithium-ion battery. No electrical installation required.
- > This product is cable free for ease of installation.
- > Rechargeable via pluggable USB charger.
- > Features an integrated PIR sensor which automatically switches the light on/off when the cabinet door is opened/closed - this feature has been improved for enhanced efficiency to include an option where the PIR sensor will only activate when the surrounding area is dark.
- > The battery life of the product is 5 months based on 2 minutes of use per day. The charging time is 3 hours on average.
- > This is the most discreet rechargeable solution - it has the slimmest profile.

Rechargeable Wardrobe Lighting >

Orion LED Under Bed Light

'illuminates the floor as motion is detected'

- > The versatile Orion light is perfect for fitting inside cabinets, wardrobes or on the underside of the bed. Ideal for retro-fitting.
- > Contains a rechargeable Lithium-ion battery. No electrical installation required.
- > The product is cable free for ease of installation.
- > Rechargeable via a pluggable USB charger.
- > Simple to install, the Orion has an adjustable hinge which is simply to be screwed to the underside of the bed.
- > The detection range of the PIR is 2m, meaning that the fitting projects a beam of light across the floor when mounted to the underside of a bed, should you need to get up in the middle of the night.
- > The battery life of the product is 5 months based on 2 minutes of use per day. The charging time is 3 hours on average.
- > The product also has an override on/off switch.

'lighting truly integrated into your wardrobe'

- > Aluminium wardrobe rail light.
- > Features an integrated PIR sensor which automatically switches the light on when the wardrobe door is opened.
- > The PIR will remain on for 30 seconds and then automatically switch off if no movement is detected to ensure there is no power wastage.
- > The rail is available in 3 standard lengths, however can be cut down from the left side if required. Ensure you leave 100mm from the left side of the sensor and the remaining length can then be cut as required.
- > Contains a soft rubber strip to prevent items from slipping on the rail.
- > The maximum weight load of the rail is 20kg.
- > Side mounting brackets provided.
- > The advantages of the Elara over the Alto are; the higher light output and no maintenance is required (no requirement to recharge).

Code	Wattage	Length	LED Qty	LED Colour	Cut Length	Lumens	Driver	RRP

Operio Mini LED Wardrobe Light

'small and discreet, side or top mount'

- > Surface mounted product for simple installation.
- > Fit at the top of a wardrobe/cabinet or at the side as pictured to throw light across the width of the wardrobe.
- > Compact design for a discreet lighting solution.
- > Contains an integrated PIR sensor switch, so the light will switch on when the wardrobe/cabinet door is opened.
- > The PIR has a detection range of 2m so the fitting can be positioned in the wardrobe as required.
- > The LED's in this fitting are concealed.
- > The curved aspect of the fitting means the light is dispersed evenly and is directed back into the wardrobe/cabinet as required.
- > High light output, low energy consumption.
- > Each 120mm fitting runs at only 1.2W.

Lighting Control >

Sensio Multi-Light Mobile Lighting Control

*Award Winning
Winner in the 'Innovation in Wifi
and App Technology' category
for the Designer Kitchen &
Bathroom Awards 2016.*

- Multiple light type control (single colour, RGB, DuoFlex)
- Simple installation, now or later (can be retrofit)

- Easy to use FREE iOS App
- No more remotes, control all lighting from one App

Sensio Multi-Light App Bluetooth Receivers

'control Sensio lighting from your mobile device'

> Control any Sensio lighting product which requires a 12/24V Sensio driver from an Apple mobile and tablet device.

> How it works:

- Simply plug the relevant type of receiver for your lighting (single colour, RGB or Duo Colour) into your drivers. A receiver* is required for each driver which is connected to lighting you'd like to control from the App.
- Download 'Sensio Multi Light' from the Apple App store (free to download).
- Switch all lighting to be controlled via the App on.
- Follow the Sensio instructions to simply configure your preferred settings.

> Features:

- On/off switching of connected lights
- Single product selection - choose to control each type/area of lighting individually
- Group lighting - group all/some of your lighting to be controlled together
- Your settings - set-up lighting area's and control each area separately
- Music - colour changing lighting will change to the sound of your music

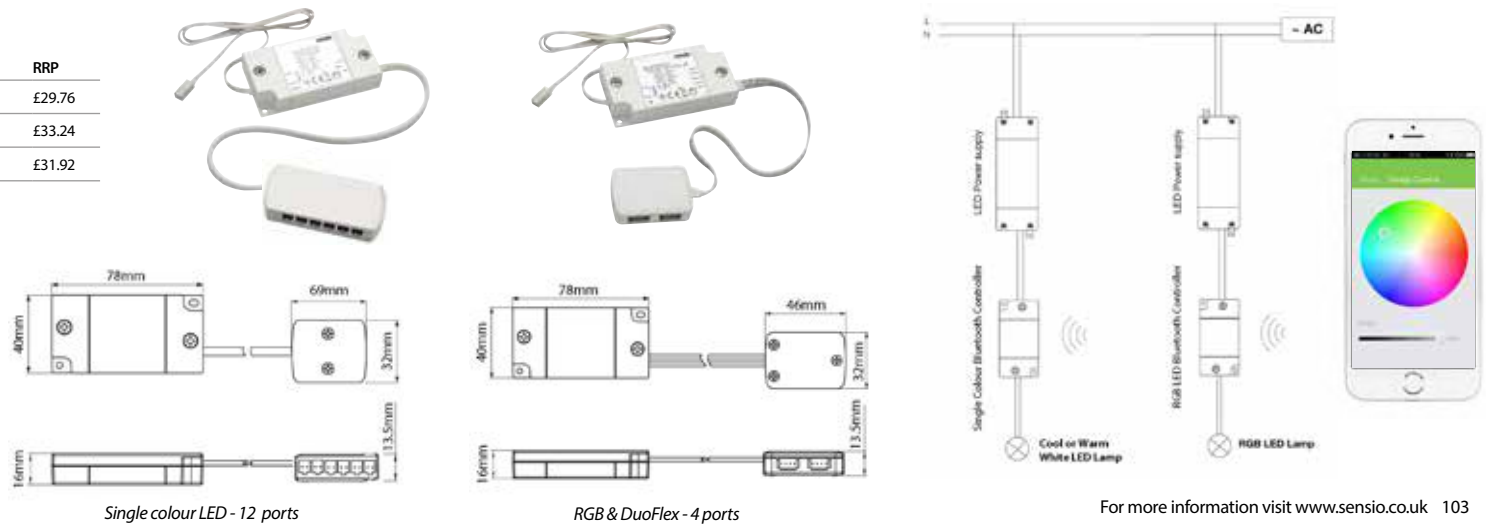

Code	Product Description	Max. Wattage	Driver	RRP
SE792990	Bluetooth Receiver - Single Colour LED	36W () or 72W ()		£29.76
SE793990	Bluetooth Receiver - RGB LED	72W ()		£33.24
SE794990	Bluetooth Receiver - Duo Colour LED	72W ()		£31.92

Driver(s) to be purchased separately

Detection range of the receivers is ≤10m

*The App can pair with up to 4 receivers

LED Dimming Remote Control

'dimming and switching for all areas of lighting'

- > Create or choose the lighting level that is perfect for you at the touch of a button.
- > Multiple functions of the dimmer:
 - Dim to the lowest light level - press the left hand button once.
 - Set to full brightness - press the right hand button once.
 - Select the desired light level by turning the dial.
 - On/off switching - press the middle button.
- > Memory function of the performance before last switched off.
- > There is no limit on the number of receivers which can be controlled via one remote control. All receivers within a 15m range of the remote can be controlled via a single remote.
- > One receiver is required for each driver (connected to the lights you wish to control).
- > Suitable for single colour LED lighting only.

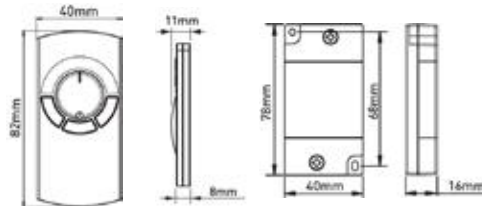

Multiple receivers can be run from 1 dimming remote control

Code	Product Description	Max. Wattage	Driver	RRP
SE790050	LED Dimming Receiver	30W () or 60W ()		£37.13
SE793090	LED Dimming Remote Control	n/a		£28.82

LED Dimming Remote Control

Driver(s) to be purchased separately

Cannon Cabinet/Swipe Sensor Switch

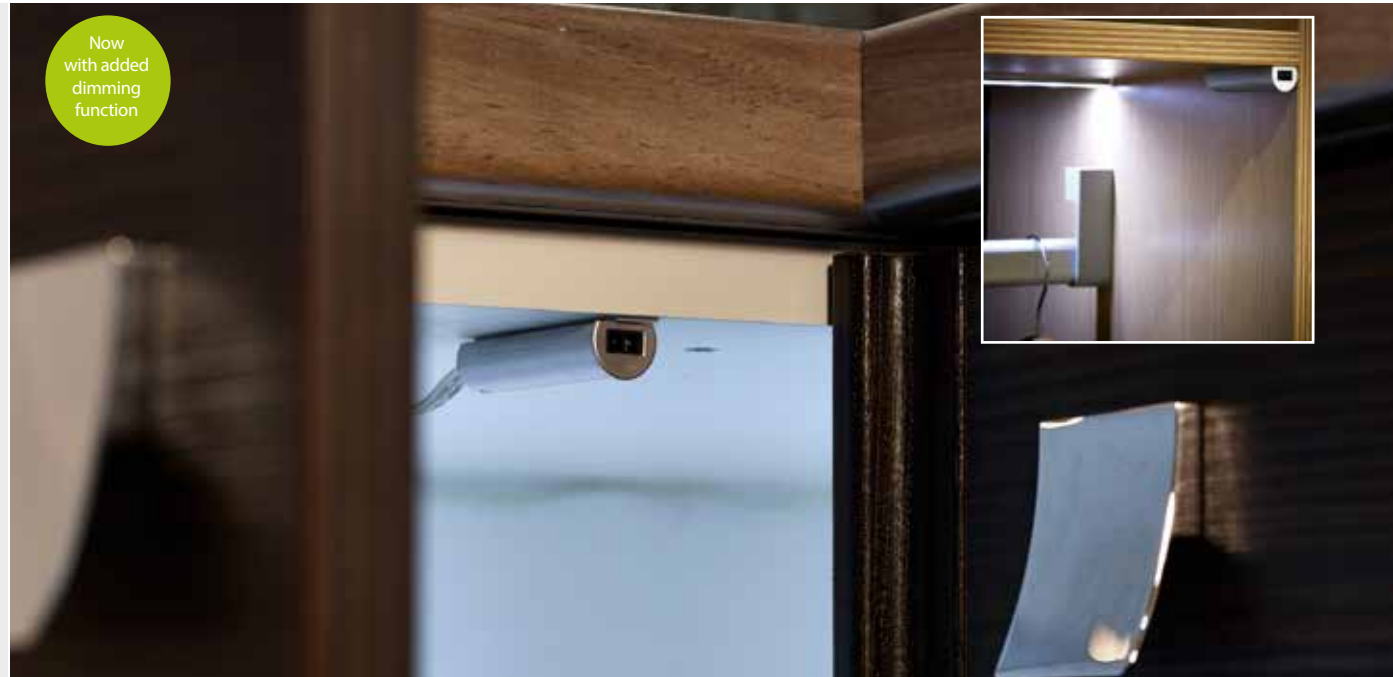

FINISH:
aluminium

CABLE LENGTH:
2.5 metres

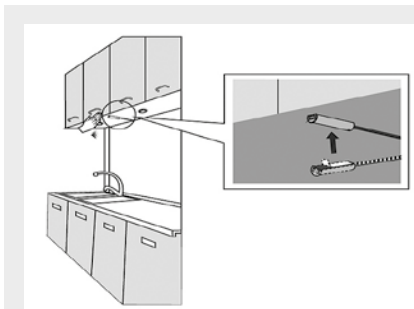

'activate and dim lights with motion'

- > Can be used with 12V & 24V products (without an integrated sensor) and has been upgraded to accommodate higher wattages so that more light fittings can be used with the sensor.
- > Three functions of this infra-red sensor:
 - Mount inside a cabinet – open door to activate light.
 - Mount under cabinet – lights are activated when a hand passes before the sensor for less than one second.
 - Mount under cabinet - new dimming function where lights will dim down/up when a hand is held under the sensor for longer than one second.
- > 5cm detection range, so unwanted detection is not a problem.
- > Plug and play solution, simply connect the sensor to the driver, the lights to the sensor distribution block and hide the cable.
- > Can be surface or recess mounted into a pelmet
- > The product is preset to the Monostable function.
- > 1 x JB4 Distribution Block supplied with each sensor.

Now with added dimming function

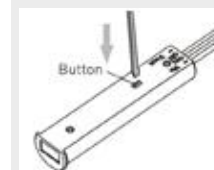

Code	Max. Wattage	Cut out:	Detection range	Driver	RRP
SE40516.1	24W (orange) or 48W (green)	14mm	5cm	Orange Green	£20.16

Bistable function

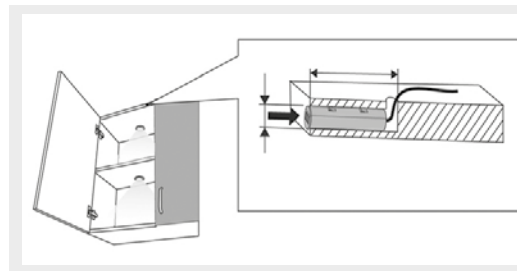

For under cabinet mounting.

1. Move your hand over the sensor to switch the lights on and then move your hand over the sensor again to switch the lights off.
2. To dim the connected lights, place your hand within 5cm of the sensor for longer than one second, the lamp will dim up/down until your hand is removed from the detection range.

Function set:

1. To set the function, first connect to the power supply.
2. Pressing the button switches the function from one to the other.

Monostable function

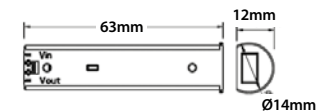

For internal cabinet mounting.

1. Open the cabinet door to switch the connected lights on.
2. Close the cabinet door to switch the connected lights off.

Connect to driver

Connect to distribution block supplied.
Connect up to 5 lights to this block

Moda LED Dimming Sensor Switch

FINISH:
aluminium

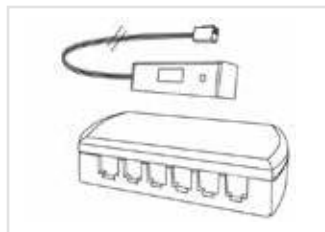

CABLE LENGTH:
1.5 metres

'3 functions including dimming'

- > Multi-functional product.
- > The SE40520 has 3 functions; use as a dimmer, external on/off switch or in-cabinet on/off switch for 12V & 24V LED products.
- > Attractive product, perfect for contemporary kitchens.
- > Use with any 12V or 24V Sensio product (without an integrated sensor).
- > Aluminium effect finish to match many of our best selling products.
- > Plug and play, and no additional wiring is required by the electrician.
- > IR Sensor with a 5cm detection range (swipe on/off function).
- > Memory function of the last setting before the lighting was switched off.
- > 1.5m cable from the sensor to the JB4 plug and 1.5m from the sensor to the 6 port JB4 distribution block.

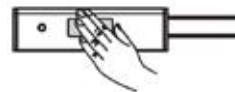

Code	Max. Wattage	Detection range	Driver	RRP
SE40520	15W () or 30W ()	5cm		£17.76

Extremely simple connection system. The JB4 plug from the sensor connects to the LED driver and the lights connect to the distribution block on the sensor.

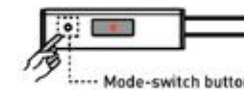

Operation:
The SE40520 sensor has three functions.

Under cabinet - The lights are activated by a hand swipe across the sensor and deactivated the same way.

In Cabinet - The lights are activated by the opening of a cabinet door and deactivated once the door closes.

Dimming - Hold your hand in front of the sensor to dim the lights. The lights will dim/brighten in increments of 10%. Remove your hand once the desired brightness level is achieved.

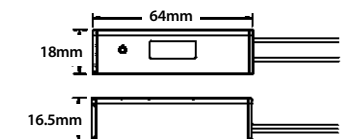

Once a power source is connected a red indicator light within the sensor will illuminate when the lights are off.

This fitting can be used under a cabinet or inside a cabinet. To switch the function of the sensor press the mode-switch button.

A maximum of 11 products can be connected to the Moda (unless daisy chained).

SE40520 - Dimming Sensor Switch

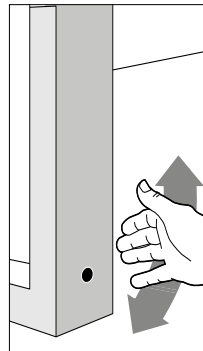

250W Infra-red Sensor Switch

'activate your lights with motion'

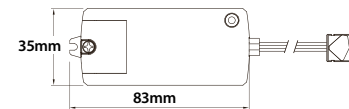

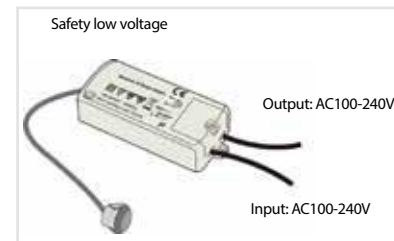

- > Maximum detection range: 5-10cm, to ensure the sensor is not activated when not required. Swipe hand past the sensor to activate lights.
- > Can be used with; 12V, 24V or 240V fittings.
- > Suitable to use with the majority of Sensio fittings.
- > The motion sensor detects body heat motion and automatically switches the lights on or off.
- > High wattage of 250W means the sensor will run a large number fittings.
- > Rated input voltage: AC100-240V.
- > Discreet fitting, sits almost flush to the furniture with a cut-out of only 13mm required.

Code	Max. Wattage	Cut out:	Cable length:	Detection range	Driver	RRP
SE40517	250W	13mm	2m	5-10cm	 or 240V	£27.96

Recess into the side panel of a kitchen cabinet. A hand swipe will switch all connected lighting on/off.

In-Cabinet PIR Sensor Switch

FINISH:

aluminium

CABLE LENGTH:

1.5 metres

'discreet in-cabinet motion sensor switch'

- > Suitable to be used with 12V, 24V or 240V products without an integrated sensor.
- > Works as an on/off switch for lighting installed inside cabinets or wardrobes. Mount in a side panel or back panel of an internal unit.
- > Small and discreet product.
- > This sensor does not have any JB4 connectors.
- > A dial on the front of the sensor unit allows you to select the time delay on the sensor (from 10 seconds to 3 minutes).
- > 80° detection angle.
- > 0.5m - 2.5m detection range.

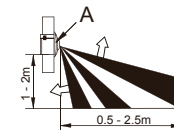

Code	Max. Wattage	Detection range	Driver	RRP
SE40515	250W	0.5-2.5m	 or 240V	£29.64

Good Sensitivity

Poor Sensitivity

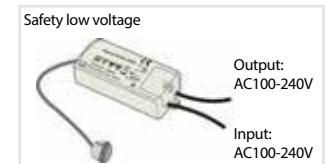

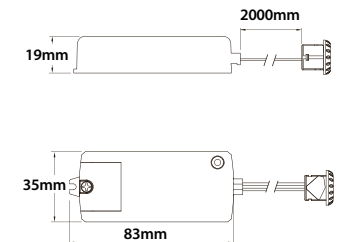

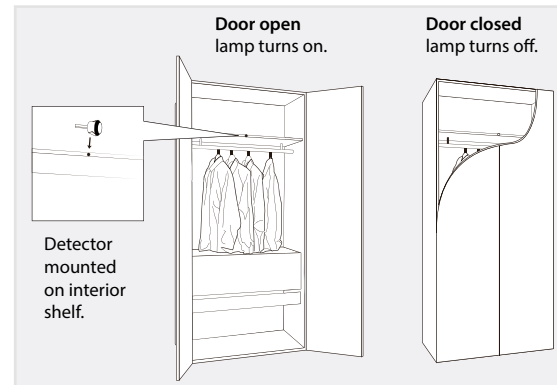

250W In-Cabinet IR Sensor Switch

'door sensor switch to activate your lights'

- > Detection range of 5-10cm. Recess into internal shelves in wall units or wardrobes. When the door is opened all connected lighting will be switched on and switched off when the door closes.
- > Can be used with; 12V, 24V or 240V fittings which do not have an integrated switch or sensor.
- > High wattage of 250W means the sensor will run a large number fittings.
- > The light(s) will switch on once the door opens as the sensor detects that the door is no longer blocking its path and they'll be switched off once the door is closed.
- > Very discreet switching option, especially in darker furniture.
- > Can be used in kitchens or bedrooms.

Code	Max. Wattage	Cut out:	Cable Length	Detection range	Driver	RRP
SE40518	250W	13mm	2m	5-10cm	or 240V	£27.96

Cable connect system

Changing LED light fittings couldn't be simpler!
The Sensio cable connect system enables light fittings to be easily changed without the need to access or remove existing cabling.

Save time and money with the Sensio cable connect system

Features & benefits:

- > No need for a fitter if you wish to change or replace an LED fitting as the cabling does not need to be accessed or pulled through from behind the cabinet.
- > Lamps can be changed by anyone.

- > Available on HD LED under cabinet spot light products.
- > Each fitting has a 2.5m cable. The lamp has a 35mm cable with JB4 plug which connects to the main run of cable.

Connecting by colour

Sensio's colour coding system makes ordering everything required for your lighting design that little bit simpler.

To simplify the process of selecting the appropriate driver for your lighting requirements, Sensio use a simple colour coding system. The cable on the light fitting, the distributor block on the driver and the outer packaging for each product all carry a colour-coded label.

- > All **components** are **colour coded**.
- > The **packaging** is **colour coded**.
- > The **cable** on the product (above the connection plug) is **colour coded**, this ensures that there is no danger of connecting a product to a driver of the incorrect voltage.
- > The **wattage of the driver is also indicated on the block** so when connecting fittings you can be sure not to exceed the wattage allowance of the driver.

All components and even the packaging is colour coded.

All drivers featured in this brochure are coded with a small coloured square. Simply refer to the product table opposite to find the colour that is correct for your lights.

Drivers

How to select the right driver for your lights:

1. All **drivers** in this brochure are **colour coded**. Refer to the product table to find the colour that is correct for your lights.
2. Each driver can run a number of lights. Simply **divide the wattage of the driver by the wattage of a single light** and this will tell you exactly how many lights can be run by the driver.

Example:
15W driver with 3W lights
 $15 \div 3 = 5$ lights

3. **Sensio drivers are available in various wattages** e.g. 15W and 30W. Simply work out the best option dependent on the number of lights you have.

Note: Drivers have a limited number of ports where lights are connected. A driver with 12 ports is therefore limited to a maximum of 12 lights. See the table for the number of ports.
